[The Historic Quarter of the Seaport City of Valparaíso.](#)

THE HISTORIC QUARTER OF THE SEAPORT CITY OF VALPARAÍSO

The colonial city of Valparaíso presents an excellent example of late 19th-century urban and architectural development in Latin America. In its natural amphitheater-like setting, the city is characterized by a vernacular urban fabric adapted to the hillsides that are dotted with a great variety of church spires. It contrasts with the geometrical layout utilized in the plain. The city has preserved its interesting early industrial infrastructures, such as the numerous 'elevators' on the steep hillsides.
